

NEWS RELEASE

TRISTEL SPONSORS BIG DATA IN HEALTHCARE CONFERENCE

October 2018

Tristel is sponsoring Salford Professional Development's Big Data in Healthcare Conference this month.

Now in its fourth year, the event is renowned for offering ideas for innovation in data usage and analytics at Kings House Conference Centre in Manchester, on 18 October.

Tristel will be demonstrating its latest digital tool, which provides compliance and traceability in a smart and efficient way. It comprises a bespoke system that records every disinfection event on a smart phone, together with a Web Portal for analysis and reporting. Disinfection data can be easily searched, filtered and extracted.

Other programme highlights include:

- The future of healthcare data innovations with Professor Daniel Ray, Director of Data, NHS Digital.
- The big picture with big data – how data visualisations can support healthcare and workforce transformation with Dr John Paul Jeans, Anaesthetist, Imperial College Healthcare NHS Trust.

To find out more about the conference visit Big Data in Healthcare Conference website: <http://conference.org.uk/big-data-in-healthcare-conference>.
