JET PRO

READY TO USE JET PRO? LET'S GET STARTED.

PRE-USE CHECKS

Some important reminders before starting:

✔ Use biocides safely. Always read the label and product information before use.

✔ Wear the appropriate personal protective equipment (PPE) when handling disinfectants.

✔ Do not use if product is damaged.

✔ **JET PRO** is for healthcare professional use only.

✔ Do not apply to brass, copper, aluminium, mild steel, or silver surfaces.

✔ Ensure the surface is free from heavy soiling before use.

HOW TO USE

1

To assemble **JET PRO**, take a trigger, unscrew the caps on the bottles, and following the red A and blue B indicators on the bottle label, insert the red tube into the side of the bottle marked with the red A and the blue tube into the side of the bottle marked with the blue B.
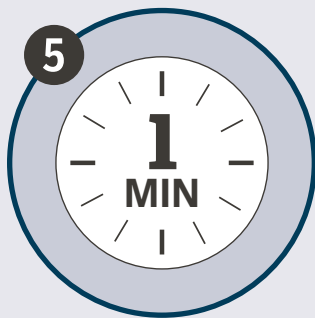

2

Fasten the levers anti-clockwise on each side of your trigger to secure. Ensure the nozzle is aligned to the top line on the trigger head. **JET PRO** is now ready for use.

3

Apply at least 2 doses onto a wipe.

4

Wipe onto the surface.

5

Ensure the surface remains wet for 1 minute. Apply additional solution as needed. Leave to dry. **JET PRO** will continue working to protect your surfaces for up to 8 hours.

6

When you can't recycle, reuse! Read the 'BIG IMPACT' section below to find out more.

BIG IMPACT

Your **JET PRO** trigger should be reused with the second **JET PRO** bottle. To do this, unfasten the levers clockwise to remove the trigger. Before following the assembly instructions above, give the dip tubes a rinse with tap water and dry with a paper towel.

After use, empty **JET PRO** bottles and caps can be rinsed out with tap water and sent for recycling.

🛈 Refer to the User Guide for full instructions.

STORAGE CONDITIONS

JET PRO has a 2-year shelf life and should be stored in a cool dry place, out of direct sunlight, between 10ºC - 35ºC. See bottle label for expiry.

Once opened, **JET PRO** has an in-use life of 6 months. You can track this by noting the day you opened **JET PRO** on the bottle label (using permanent ink).
