JET™ PRO

SPORICIDAL DISINFECTION THAT KEEPS ON PROTECTING

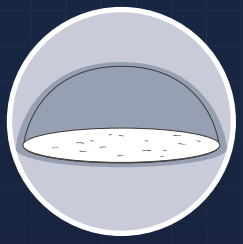

JET PRO is a sporicidal chlorine dioxide foam with an extra ingredient that enables the foam to effectively eliminate bacteria and enveloped viruses for up to 8 hours after application.

Disinfectants cannot be used every minute of every day. The combination of **JET PRO's** powerful chlorine dioxide chemistry with prolonged protection technology provides assurance for patients, staff and visitors, even after you have moved on to your next task.

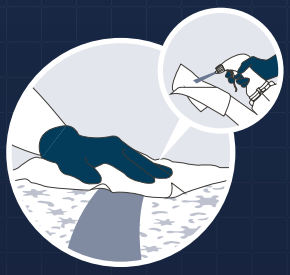

JET PRO is sporicidal in 2 minutes.

Once dry, **JET PRO** places an invisible barrier on the surface, protecting the surface for up to 8 hours.

Touching the surface weakens the protective barrier, and regrowth of microorganisms will eventually occur.

JET PRO can then be re-applied to remove microorganisms and refresh the protective barrier.

WET KILL | **DRY KILL** | **WET KILL**

TRISTEL CHLORINE DIOXIDE (ClO_2) + PROLONGED PROTECTION TECHNOLOGY

JET PRO is built upon the same chlorine dioxide (ClO_2) chemistry as the Tristel Medical Device Decontamination products. **JET PRO** incorporates two separate compartments that contain Base Solution (citric acid) and Activator Solution (sodium chlorite).

When mixed by pulling the **JET PRO** trigger, ClO_2 chemistry is generated. **JET PRO** contains an amphoteric surfactant for added cleaning performance. ClO_2 eliminates microorganisms by destroying their molecular structures. This means that harmful microbes cannot build resistance to ClO_2. An extra ingredient enables the foam to effectively eliminate bacteria and enveloped viruses for up to 8 hours after application.

SAY GOODBYE TO PRE-WETTED PLASTIC WIPES

Efficacy with the standard wipe used in EN 16615 means **JET PRO** can be paired with any dry wipe. Use a microfibre cloth or a plastic free dry wipe to create sporicidal wipes.

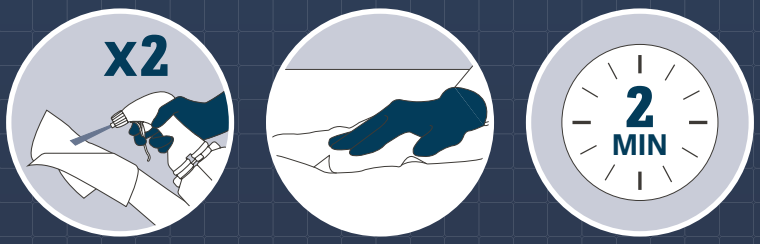

MICROORGANISM TYPE	MICROORGANISM	TEST METHOD
Bacterial Spore	*Clostridioides difficile*	EN 17126
Mycobacteria	*Mycobacterium terrae, Mycobacterium avium*	EN 14563
Virus	Herpes Simplex Virus Type 1, Poliovirus Type 1, Adenovirus Type 5	ASTM E1053
Fungi/Yeast	*Aspergillus basiliensis, Candida albicans*	EN 14562
		EN 13624
Bacteria	*Pseudomonas aeruginosa, Staphylococcus aureus, Enterococcus hirae*	EN 14561
		EN 13727
RESIDUAL ACTIVITY		
Virus	*Vaccinia virus*	PAS 2424
Bacteria	*Pseudomonas aeruginosa, Staphylococcus aureus, Enterococcus hirae, Escherichia coli*	PAS 2424

DID YOU KNOW?
PAS 2424 is the only test method available to evaluate a disinfectant's long-last antimicrobial activity.

EASY TO USE, APPLY, WIPE & WAIT

Each bottle of **JET PRO** delivers 570 doses of sporicidal chlorine dioxide foam.

Simply apply, wipe and wait!

Contact your local Sales Representative to learn how **JET PRO** can improve your infection control procedures.
