SPORICIDAL DISINFECTION IN 1 MINUTE

JET is a sporicidal chlorine dioxide foam. With each pull of the trigger, you can target surfaces where microbes are a risk.

JET's non-aerosol technology prevents liquid from circulating in the air. As your medical device surface disinfectant partner, use JET in patient bed spaces and treatment rooms*.

*Refer to user instructions. Not to be used on invasive devices.

TRISTEL CHLORINE DIOXIDE (ClO₂)

JET is built upon the same chlorine dioxide (ClO₂) chemistry as the Tristel Medical Device Decontamination products. **JET** incorporates two separate compartments that contain Base Solution (citric acid) and Activator Solution (sodium chlorite).

When mixed by pulling the **JET** trigger, ClO₂ chemistry is generated. **JET** contains an amphoteric surfactant for added cleaning performance. ClO₂ eliminates microorganisms by destroying their molecular structures. This means that harmful microbes cannot build resistance to ClO₂.

ECO-FRIENDLY SPORICIDAL WIPES

Efficacy with the standard wipe used in EN 16615 means **JET** can be paired with any dry wipe. Use a microfibre cloth or a plastic free dry wipe to create sporicidal wipes. You can stop using pre-wetted plastic wipes.
