

Tristel | DesiCoach[®] 2Go

Train hand hygiene,
protect health.

Tristel[™]
We Have Chemistry

The problem

Even experienced professionals make unintentional mistakes when performing hand hygiene.

Your hands are your most important tool, whether you use them to perform life-saving surgery, to disinfect a medical device, to administer medicine or to comfort a patient.

All healthcare staff play an equally essential part in providing a safe environment for patients.

The health of patients is in your hands.

That is why it is so important that your hands are free from contamination before putting them to good use.

But how can you be sure that your hands are free from contamination, when contamination is invisible? How can you know that what you cannot see, is in fact not there?

The solution

Using the power of **colour**, DesiCoach® 2Go visualises your hand hygiene process so that mistakes can be avoided.

DesiCoach® 2Go has been developed to reassure you. Where a UV-box only shows you the mistakes you make, DesiCoach® 2Go empowers you to improve instantly and continuously by taking matters into your own hands.

Incorporating a plant-based colourant, DesiCoach® 2Go shows you how well you are disinfecting your hands, and points out areas on your hands that require further attention. This way you can make sure that your hands are truly free from contamination.

Often forgotten

DesiCoach® 2Go

Getting started

Step 1

Order

Order one DesiCoach® 2Go box which contains 25 sessions and a participation form.

Each DesiCoach® 2Go session contains 2 x 4ml sachets, plus an individual access code for the interactive instructions.

Step 2

Distribute

Distribute the DesiCoach® 2Go sessions to your team.

Use the participation form to assign access codes. You can track who has finished their training on the evaluation page.

Step 3

Train

Your team now trains individually in their own time or during a scheduled group session.

The results of each training session are 100% anonymous. Participation, on the other hand, is always recorded.

Step 4

Evaluate

The participation form gives the administrator digital access to review and analyse the results via a password-protected website.

You can download, save and print the anonymous training results. This way you can easily fulfill your documentation obligations.

DesiCoach® 2Go

The Training

Step 1

Apply the DesiCoach® 2Go colouriser to your hands and rub in.

Step 2

Your hands will start to turn pink after the colouriser has dried.

Step 3

Look for any missed areas and follow the digital prompts to improve your hand hygiene practice.

Step 4

Apply the DesiCoach® 2Go decolouriser to your hands and rub in, using the prompts from Step 3.

Step 5

See your hand hygiene practice improve.

Step 6

Receive your training result.

With digital instructions.

Ingredients

Skin-friendly colourants

The colourant in DesiCoach® 2Go is 100% plant-based. It is found in **blackberries**, **raspberries**, and **cherries** amongst others. There are no intolerances to this natural substance.

The usability and skin compatibility of DesiCoach® 2Go has been tested and confirmed by several independent institutes.

In order to achieve comparable properties to your preferred hand hygiene product, DesiCoach® 2Go is based on similar ingredients:

Alcohol, water and re-greasing agents.

**Plant-based
colourants**

Allergen-free

**Dermatologically
tested**

**Certified as a
cosmetic product**

Hygiene training & compliance

Regular training increases compliance.

Observational studies have shown that the relative frequency of hand hygiene increases significantly after training.

All in all, the training increases motivation for regular disinfection tremendously.

01

The training brings hand hygiene more into focus of our perception.

As a result, we are reminded to perform hand hygiene more often.

02

The training emphasises the importance of hand hygiene for infection protection. The implicit message:

“In my establishment hand hygiene is extremely important!”
