THE COMPLETE INFECTION CONTROL PACKAGE FOR LABORATORY ENVIRONMENTS

Utilising Tristel's proprietary chlorine dioxide chemistry, the Tristel for Labs range is effective in short contact times and compatible with hard, non-porous materials such as laminate, glass, plastics and stainless steel.

TRISTEL DUO

A sporicidal disinfectant foam for easy application. Tristel Duo for Labs kills organisms, including bacterial spores, on a surface with a contact time of only 30 seconds.

Use on:

- Isolators
- Ventilator hoods and cabinets
- Centrifuges
- Work surfaces
- Benches

TRISTEL FUSE

A liquid sporicidal solution delivered in Tristel's unique burstable sachet, to quickly create two litres of chlorine dioxide solution.

Use on:

- In vitro diagnostic test equipment
- Discard pots
- Floors
- Walls

TRISTEL FLEX

Using the dilution chart provided on the bottle label any required volume of Tristel sporicidal disinfectant solution can be prepared, avoiding wastage.

Use on:

- Spillages
- Isolators
- Interior of centrifuges
- Disinfection of liquid waste

Tristel™
for Labs

Classified as biocides under the Biocidal Products Regulation (EU) 528/2012.
Use biocides safely. Always read the label and product information before use.

EFFECTIVE

The Tristel for Labs products are proven effective against microorganisms of concern such as:

- *Bacillus subtilis*
- *Bacillus cereus*
- *Candida albicans*
- *Mycobacterium tuberculosis*
- *Mycobacterium avium*
- *Mycobacterium terrae*
- SARS-CoV-2*
- Poliovirus Type 1 & 2
- Adenovirus Type 5
- Vaccinia virus
- Hepatitis C virus (HCV)
- Herpes simplex virus Type 1 (HSV-1)
- Human immunodeficiency virus (HIV)
- *Pseudomonas aeruginosa*
- Gentamicin-resistant *Pseudomonas aeruginosa*
- *Staphylococcus aureus*
- *Enterococcus hirae*
- Methicillin-resistant *Staphylococcus aureus* (MRSA)
- Vancomycin-resistant Enterococci (VRE) *Enterococcus faecium*

COMPATIBLE

Chlorine dioxide has been tested and confirmed to be compatible with materials found in the laboratory environment including:

- Stainless Steel
- Glass
- Polyether ether ketone (PEEK)
- Polypropylene (PP)
- Polyvinylidene fluoride (PVDF)
- Polytetrafluoroethylene (PTFE)
- Polymethyl methacrylate (PMMA)
- Acrylonitrile butadiene styrene (ABS)
- Polycarbonate (PC)

POWERED BY CHLORINE DIOXIDE

All Tristel for Labs products incorporate Tristel's patented chlorine dioxide chemistry.

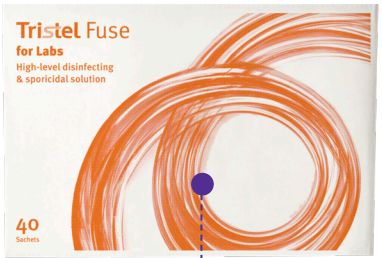
Chlorine dioxide is a broad-spectrum biocide with proven efficacy against a wide range of micro-organisms including bacteria, viruses, fungi, mycobacteria, and bacterial spores. Generated at point of use, Tristel chlorine dioxide destroys SARS-CoV-2, the virus which causes COVID-19*.

Due to the way that chlorine dioxide breaks down and destroys microorganisms, resistance cannot develop over time.

CHLORINE DIOXIDE DESTROYS SARS-CoV-2*

FIND OUT MORE: BIT.LY/SARSCOV2LABS

*A representative sample of Tristel chlorine dioxide at 20 parts per million (ppm) was tested by a United States Biosafety Category 3 laboratory.



TRISTEL FUSE FOR LABS

40 x sachets per carton

TSL010501

TRISTEL DUO FOR LABS

6 x 250ml bottles per carton

TSL021601

TRISTEL FLEX 1 DAY

1 Litre Base + 1 Litre Activator bottles per carton

TSL040801
