# TRISTEL CHLORINE DIOXIDE (ClO<sub>2</sub>)

**JET LUX** is built upon the same chlorine dioxide (ClO<sub>2</sub>) chemistry as the Tristel Medical Device Decontamination products. **JET LUX** incorporates two separate compartments that contain Base Solution (citric acid) and Activator Solution (sodium chlorite).

When mixed by pulling the **JET LUX** trigger, ClO<sub>2</sub> chemistry is generated.

**JET LUX** contains an amphoteric surfactant for added cleaning performance.

ClO<sub>2</sub> eliminates microorganisms by destroying their molecular structures.

This means that harmful microbes cannot build resistance to ClO<sub>2</sub>.

## SAY GOODBYE TO PRE-WETTED PLASTIC WIPES

Efficacy with the standard wipe used in EN 16615 means **JET LUX** can be paired with any dry wipe.

Use a microfibre cloth or a plastic free dry wipe to create sporicidal wipes.
