Tristel Fuse[™] for Surfaces

High-level disinfecting & sporicidal solution for preventing outbreaks and ward closures

Pour five litres of ambient water into a container.

Note: Do not use hot water.

Take one sachet, fold in half and squeeze one side to burst contents through the centre seal. Contents will start to turn yellow.

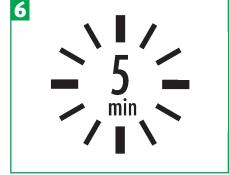

Tear or cut the sachet.

Pour the contents into the five litres of water.

Apply disinfectant to surfaces with a mop for floors or a cloth for damp dusting and leave to dry.

Ensure a five minute contact time.

Notes:

- Make up solution in a well-ventilated area.
- Wear appropriate PPE. Refer to the Safety Data Sheet and to your hospital protocol.
- Store in original packaging in a cool, well-ventilated area out of direct sunlight.
- Once mixed, solution can be kept for up to 24 hours when stored in an air tight container.
- Dispose of empty packaging in accordance with local policy and national regulations.
- Avoid contact with skin and eyes. Contact with the disinfectant may cause irritation. Wash affected areas with plenty of soap and water.
- Rinse container with water after use.
- Do not use if packaging is damaged.
- For professional use only.
