## SPORICIDAL DISINFECTION IN 1 MINUTE

**JET** is a sporicidal chlorine dioxide foam. Each pull of the trigger targets surfaces where microbes are a risk.

**JET's** non-aerosol technology prevents liquid from circulating in the air. As your medical device surface disinfectant partner, use **JET** in patient bed spaces and treatment rooms.

## TRISTEL CHLORINE DIOXIDE (ClO<sub>2</sub>)

**JET** is built upon the same chlorine dioxide (ClO<sub>2</sub>) chemistry as the Tristel Medical Device Decontamination products. **JET** incorporates two separate compartments that contain Base Solution (citric acid) and Activator Solution (sodium chlorite).

When mixed by pulling the **JET** trigger, ClO<sub>2</sub> chemistry is generated. **JET** contains an amphoteric surfactant for added cleaning performance. ClO<sub>2</sub> eliminates microorganisms by destroying their molecular structures. This means that harmful microbes cannot build resistance to ClO<sub>2</sub>.

## ECO-FRIENDLY SPORICIDAL WIPES

Efficacy with the standard wipe used in EN 16615 means **JET** can be paired with any dry wipe. Use a microfibre cloth or a biodegradable dry wipe to create sporicidal wipes. You can stop using pre-wetted plastic wipes.
