

# Semi-automated disinfection made simple

Stella is a semi-automated washer disinfector designed specifically for the disinfection of invasive and non-invasive, heat sensitive, non-lumened and single-lumened medical devices used in Urology, Gynaecology, IVF, Cardiology, ENT, Anesthesiology and Respiratory.

Stella combines the simplicity of manual soaking with the sophistication of a fully automated washer disinfector.

### **APPLICATIONS**

High-level disinfection of semi-critical medical devices, including:

- Bronchoscopes
- Cystoscopes
- Hysteroscopes
- Intubation endoscopes
- Laryngoscopes
- Manometry catheters
- Nasendoscopes
- Transesophageal Echocardiography (TOE/TEE) probes
- Transrectal probes
- Transvaginal probes

### **COMPATIBLE**

Tristel Fuse for Stella has been tested and confirmed to be compatible with medical devices from manufacturers, including\*:

- BK Medical
- Canon Medical Systems
- Carestream
- Fujifilm (Hitachi)
- Gaeltec
- Karl Storz
- Philips
- Unisensor

# **PUBLICATIONS**

Stella reduces capital spend and reprocessing times. Xuan Wu Hospital, China. January 2016.

Stella enables Shanghai Pulmonary Hospital to high-level disinfect bronchoscopes nine times faster.

Shanghai Pulmonary Hospital, China. January 2016.

A randomised single-blind comparison of the effectiveness of the high-level disinfectants Tristel Fuse (chlorine dioxide) and Cidex OPA (ortho-phthalaldehyde) for use with flexible cystoscopes.

Time for a change at the Reading Urology Partnership. April 2012.

Stella for simple GI manometry disinfection.
Rising to the challenge at Castle Hill. May 2012.

## **INCREASES PATIENT THROUGHPUT**

Stella's high-level disinfection cycle time is five minutes. When cleaning is included, the cycle time is ten minutes.

#### **MOBILE & LIGHTWEIGHT**

Stella measures 70cm x 48cm x 18cm and weighs 5.5kg when empty. The base and lid can be stacked and easily transported due to their portable size and weight.

#### **GIVES YOU PEACE OF MIND**

Prior to the start of each cycle, Stella confirms that Tristel solutions for Stella are used. It also checks that there is no channel blockage.

At the end of each cycle, Stella provides the user with a unique traceability code.

#### **ECONOMICAL**

Stella requires minimal capital investment when compared to a fully automated washer disinfector. The short cycle time improves the turnaround of medical devices enabling you to operate with fewer of them.

#### SAFE FOR MEDICAL DEVICES

When Stella irrigates the lumen, it monitors the back pressure of the Tristel solution passing through it and adjusts the pressure to protect it. The solution also pulses through the lumen, rather than moving at an even flow, dislodging soil and bio burden in the process.

## **IMPROVES HEALTH & SAFETY**

Tristel Fuse for Stella utilises Tristel's proprietary chlorine dioxide (ClO<sub>2</sub>) chemistry, a well-documented and highly effective biocide. The Health and Safety profile of chlorine dioxide is superior to that of sodium hypochlorite, peracetic acid and glutaraldehyde.

 $<sup>{\</sup>bf *Material\ compatibility\ refers\ to\ certain\ medical\ devices/models.}$ 

Refer to the Stella Help Guides, Quick Guides and Instructions for Use for full instructions.

Turn on Stella IQ.

Turn on Stella Pulse.

Add the cleaned medical device – connect lumened medical devices (in the case of Stella B/C) to Stella Pulse.

**Note:** When using Stella C, the medical device should be pre-cleaned.

If using Stella for medical device cleaning prior to high-level disinfection, prepare five litres of Tristel Clean for Stella and add to the inner compartment of the base.

For the high-level disinfection cycle, add one sachet of Tristel Fuse for Stella to five litres of water and add to the inner compartment of the base.

Close the lid and Stella will do the rest. The high-level disinfection cycle time is five minutes. When cleaning is included, the overall cycle time is ten minutes. Stella drains automatically.

At the end of the cycle, Stella will issue a validation code to confirm it has completed successfully. This should be recorded in the Stella Quality Audit Trail Record Book or downloaded to the Stella Suite.

## **PRODUCT INFORMATION**

#### **STELLA SYSTEM A**

For the high-level disinfection of non-lumened medical devices.

## **STELLA SYSTEM B**

For the high-level disinfection of non-lumened and single-lumened medical devices.

### **STELLA SYSTEM C**

For the cleaning and high-level disinfection of non-lumened and single-lumened medical devices.
