

EVA COLPO

Colposcopy Streamlined

A turn-key cervical and vulvar visualization solution to streamline how you perform, document and review patient cases

The EVA System is the first really new and exciting equipment upgrade that allows for exceptional portability while providing quality images for the clinician to interface with electronic health records or print for paper records.

Cheryl A. Gibson, MD FACOG
CLINICAL ASSOCIATE PROFESSOR OB/GYN
UVM COLLEGE OF MEDICINE

Use the **EVA COLPO** to:

Visualize and capture

View and save high-quality cervical images and video on an FDA-cleared video colposcope, with up to 16x optical magnification

Collaborate securely

Consult with peers in real time via secure case-sharing to assess optimal patient treatment

Streamline workflows

Ensure seamless information management with HIPAA-compliant online security and easy data export for integration with electronic medical records (EMRs)

Annotate and document

Add annotations to captured images for clear biopsy location documentation

Analyze and educate

Use for quality assurance purposes and as a teaching tool for trainees and residents in how to conduct quick, simple, and accurate colposcopies

FAST · SECURE · EASY · AFFORDABLE

GOODBYE BIG, BULKY AND EXPENSIVE. HELLO EVA

The FDA-cleared EVA COLPO is a portable, internet connected colposcope that is as simple to use as a smart phone. The EVA System combines advanced hardware with integrated software to serve a variety of clinical needs

Choose the EVA System smart colposcope to utilize:

A simple interface

EVA's easy-to-use software enables patient data management, image and video capture, annotation tools, clinical decision-tracking, and simple case export for integration into EMRs

Improved workflow

EVA's integrated data collection and online storage solution reduces unnecessary paperwork and saves time

Enhanced clinical services

EVA's affordability enables cervical examinations with a video colposcope at a fraction of the price of a traditional colposcope

Real-time or after the examination

Use EVA to stream your examination live to any place around the world or use secure case-sharing features to receive clinical support and quality assurance from experts and peers

Empowered patient experience

Enhance patient understanding of their health condition, diagnosis, and treatment options through educational image review

The EVA System is one of the greatest things to happen to women's cervical health. It is really amazing to go back and review results versus my initial impression of individual lesions."

Bonnie Betts
NURSE PRACTITIONER,
FPA MEDICAL

A mobile colposcope needs a disinfectant that is equally mobile.

Based on Tristel's proprietary chlorine dioxide chemistry, Tristel Duo EVE is designed specifically for the disinfection of non-invasive medical devices such as colposcopes and non-porous surfaces of medical equipment used in Women's Health. It does not require electricity or water to do its job. Tristel Duo EVE is effective against microorganisms of concern, including HPV, with a contact time of only 30 seconds.
